Multiformat Dual Screen 10.4-Inch Monitor Set

V-R102DP-HDA

Our V-R102DP-HDA 10.4-inch display provides up to 20% more viewing area than the competitors' 8.4-inch LCD or 8 and 9-inch CRT models yet occupies the same amount of space. Ready to rack mount in 5RU, this model is less weight and has lower power consumption than similar CRT and LCD products.

The V-R102DP-HDA features our Award Wining Digital TFT-MegapixelT system plus Hyper Process motion compensation for interlace images. Inputs are provided for HD or SD Component Analog, Composite, Y/C, DVI Analog or Digital from HDMI with HDCP, plus PC up to SXGA resolution (1280x1024).

Analog signals are digitized using an advanced 10 bit process, and all screen formats are scaled to fit on screen in the highest resolution using our proprietary program and state of the art LSI with Match Color Conversion to emulate SMPTE-C phosphor of a CRT.
