The highest picture quality, functionality and reliability with Ikegami's superb and latest camera technology

• Supprts high-band 3G HDTV-SDI video output

- 2 times slo-motion
- Supports 3D
- Supports custom gamma
- 16-bit full digital

Supprts high-band 3G-SDI(1080p59.94/50Hz) video output

The camera supports 3G-SDI 1080p (59.94/50Hz) wide-band video output as a standard feature for higher picture quality. The single and dual link output is available with CCU-970/BS-97 camera control unit/base station supporting 3G-SDI signal.

2 times slo-motion (1080i 119.88/100Hz)

Switchable for live and slo-motion picture with one camera. It is possible to get a slo-motion picrure without changing the camera positon. (Option)
*The simaltaneous output for live and 2 times slo-motion picture is now under development.

3D support

The 3D picture is available easily with 3D capable lens. (Option, under development)

Supports custom gamma

Various kinds of gamma curve can be flexibly set by users.

Newly developed 2.3 Mega pixel progressive sensors

New 2/3-inch 2.3 Mega pixel 1080 progressive CCDs are employed to support not only the usual 1080i 59.94/50Hz 4:2:2, 720p 59.94/50Hz 4:2:2 1.5G formats, but also 3G formats such as 1080p 59.94/50Hz 4:2:2 and 1080i 59.94/50Hz 4:4:4. (50Hz formats are option) Futhermore, 1080i (119.88/100Hz), 1080p (29.97/25Hz), 1080p (23.98Hz) are available as an option.

Newly developed FPGA

Using mass memory type FPGA, 45um design rule, the video signals are digitized with 16-bit A/D conversion

to achieve the highest possible picture quality.

Multi-format

The camera supports various HDTV formats of 1080p (59.94/50Hz), 1080i (59.94/50Hz 4:2:2, 4:4:4), 1080i (119.88/100Hz), 1080p (29.97/25Hz) and 720p (59.94/50Hz), achieving flexible picture representation.

* 50Hz formats and 1080i (119.88/100Hz), 1080p (29.97/25Hz), 1080p (23.98Hz) are option.

16-bit full digital

Integrating Ikegami's advanced picture processing technology and digital processing technology maximizes the effect of 16-bit A/D conversion, increasing gradation in dark areas where the processing is perfromed for more natual reproduction of dark colors.

Two HD-SDI outputs from the camera head

Two HD-SDI output signals (1.5G) are selectable among Camera, VF, RET and MON (monitor) for external monitoring at the camera head. * HD QTV is added to the line up of selectable HD SDI signals when the optional HD QTV (Video Trunk) module is installed in the CCU.

2 Channels QTV (Option)

Two channels of QTV output (VBS) are available as an option for prompter and external monitoring purposes. * 2 channel QTV is option in 50Hz and not available operating at 720p/50Hz.

HD SDI Trunk (Option)

When the camera is operating in a conventional 1.5G format, a second 1.5G video from an external source can be transmitted to the CCU as a video trunk channel. For POV or 3D applications this will reduce the cables which need to be run.

Docking style camera body

With a docking style camera body, either an FA (Fiber Adaptor) or TA (Triax Adaptor) can be mounted depending on the use.

Lens Aberration Correction function

The Lens Aberration Correction function is newly incorporated for minimizing the blur and colored edges caused mainly by lens chromatic aberration.

Unicam HD

HDK-970A HDK-97A Accessories

3G capable fiber adaptor FA-97

High Band 3G Transmission

3G-SDI transmission is available between camera head and CCU/BS.

Simulcast

Using a down converter and up converter incorporated in the CCU-970/BS-97, both HDTV and SDTV signals are provided simultaneously from the CCU/BS. And the CCU/BS offers not only the usual 1080i 59.94/50Hz 4:2:2 1.5G signal outputs, but also 3G outputs like 1080p 59.94/50Hz 4:2:2 and 1080i 59.94/50Hz 4:4:4(Option). * The up and down converters are options for BS-97.

RET/QTV Video

The CCU/BS accepts 4 channels of return video input as standard. The return input signals can be either 3G-SDI or HD-SDI. QTV signals can be transmitted to the camera with not only the usual analog composite, but also HD-SDI (Option for CCU only).

* The return input signal can only be HDTV when this option is installed.

State-of Art System Accessories, Expanding HDTV

SE-H750 System Expander

The SE-H750 System Expander enables the use of the 9-inch viewfinder and full studio lenses with the HDK-97A, converting the portable camera into a full facility studio camera. Installation of the camera into the SE-H750 is very easy, and conversion back to portable configuration is quick for maximum operating flexibility.

Variety of viewfinders

For the HDK-97A, 2-inch 16:9 high definition VFs for portable application are available.

In addition, 9-inch LCD color viewfinder is also available as an option.

2-inch LCD color viewfinder VFL200HD 3G capable camera control unit CCU-970

3G capable base station **BS-97**

Frame Synchronizer for RET video

The return signal can be synchronized by a frame sync circuit, supporting non-sync return sources.

* The RET input signal quantity is fixed to 2 channels when the frame synchronizer is applied. * VBS return signal can not be synchronized.

Connection to 1.5G format cameras

The CCU/BS can be used with existing Ikegami HDK-79EX series and HDK-77/79EC cameras in 1.5G mode.

* New functions provided by 3G transmission of HDK-970A/HDK-97A are not available.

Embedded audio available as standard

All SDI outputs can be embedded with the audio signals of MIC-1 and MIC-2. Each channel has variable adjustment for delay time and independent On/Off switching for embedded audio.

2-inch CRT B/W viewfinder VF421HD

9-inch CRT color viewfinder VFL912HD

Performance

Sensitivity	F10 at 2000lx (in 1080i/59.94)					
/N	62dB (in 1080i/59.94) (Typical)					
Vodulation Depth						
HDTV System	50% or more (800TV lines, 27.5MHz)					
Limiting Resolution						
HDTV System	1000TV lines (in 1	.080i/59.94)				
Video Frequency Respons	se (CCU • BS Output)					
Y Output Signal (4:2:2)	Below 60Hz	Falling				
	60Hz ~ 30MHz	within±1.0dB				
	Over 30MHz	Falling				
Pb, Pr Output Signal (4:2:2)	Below 30Hz	Falling				
	30Hz ~ 15MHz	within±1.0dB				
	Over 15MHz	Falling				
R,G,B Output Signal (4:4:4)	Below 60Hz	Falling				
	60Hz ~ 30MHz	within±1.0dB				
	Over 30MHz	Falling				
Audio Frequency Respons	se (CCU • BS Output)					
Mic-1/2 Output	Below 100Hz	Falling				
	100Hz ~ 20KHz	within±1.0dB				
	Over 20KHz	Falling				
Intercom Output	Below 100Hz	Falling				
	100Hz ~ 10KHz	within±1.0dB				
	Over 10KHz	Falling				
Detail Correction						
Vertical	5 lines					
Horizontal	Boost frequency: 13MHz ~ 24MHz (HDTV)					
Gamma	OFF, 0.35, 0.4, 0.45					
Gain	-3dB, 0dB, +3dB, +6dB, +9dB, +12dB					
Power Consumption						
HDK-970A	ТВА					
HDK-97A	Camera Head: 35W (in 1080i/59.94) 2-inch VF: 6W					
CCU-970	Approx 110VA (CCU only)					
	400VA or less (incl power for camera with cable loss)					
BS-97	Approx 80VA (BS only)					
	150VA or less (incl power for camera with cable loss)
