

Ikegami CMOS Cameras Grow How Far Your Message Goes

Across the aisle, across campus, or over devices – lifelike video brings parishioners closer. Ikegami connects congregations of all sizes with engaging imagery, with the high dynamic range of CMOS sensors.

The highly flexible **HC-HD300** and our newest Unicam - the cost-effective **HDK-73** - deliver exceptional performance when capturing LED displays.

The extreme reliability of Ikegami systems is matched by our commitment to complete customer support. It's a positive experience that houses of worship count on.
